

Syllabus: Media Archaeology 2016

ENGL 603: Media Archeology

August 1-5, 2016

3 credits

Darren Wershler (Concordia University)

Stephanie Boluk (UC Davis)

Patrick LeMieux (UC Davis)

Description

What is media archaeology? As Jussi Parikka describes, it is a subfield of media history that scrutinizes contemporary media culture through investigations of past media technologies and creative media practices. Media archaeology takes a special interest in recondite and forgotten apparatuses, practices and inventions. At an historical moment when our own media technologies become obsolete with increasing rapidity, the study of residual forms and practices provides valuable context for analysis, and perhaps the possibility for the emergence of something new.

This course deals with the theory, current practice, and possible trajectories of media archaeology as a discipline. Our object of study will be the research collection of the new Residual Media Depot of the Media History Research Centre at the Milieux Institute. Work will consist of a mix of writing, thinking, talking, and hands-on encounters with materials from the collection, according to student skills and preferences.

Structure

This intensive one-week graduate course (5 days, Monday – Friday 9 am – 5 pm) will run for the first time in August

2016. It will consist of approximately 14 graduate students (PhD level preferred), 7 from Concordia and 7 from the EU and the USA. Dr. Darren Wershler (CURC in Media & Contemporary Literature), Dr. Stephanie Boluk (UC Davis) and Dr. Patrick LeMieux (UC Davis) will lead the course.

During the actual course, mornings will follow a seminar model. Course members will receive their reading packages digitally in July, and they will be expected to arrive ready to discuss this material. We will make frequent use of breakout groups of various kinds, concept mapping and daily individual blog posts to structure our conversation. In order to provide further context, all seminar members will also spend time locating media examples for in-class screenings in order to provide further contextual information.

Afternoons will consist of work time for a collective project in applied media archaeology. This project will take the form of a “book sprint”; our goal will be to produce a working first draft by the final afternoon of the week. Our theoretical touchstones will come from the morning readings. We will decide collectively how to structure the form and content of the draft, and what its eventual publication venue will be. Students will have access to a full range of Milieux workspaces and equipment during this period.

Students

Interested students will be invited to submit a short (500-750 word) statement outlining their field of study, their projected doctoral project, and a description of how this course fits into their intellectual program. Please send all queries to d.wershler@concordia.ca ASAP.

Evaluation

Eligible students will receive 3 credits for this course. They will be graded according to the standard Concordia grading scale, based on the quality of their contributions to the

morning seminar (50%) and their research and writing for the book sprint (50%). This will take the form of daily working notes (blog entries) of 750-1000 words per day.

Readings

Readings consist of major texts from media archaeology, material media studies, cultural technique theory, video game studies and articulation theory. All seminar participants will arrive having completed the primary readings in advance. We have made some secondary readings available as well, and will add more over the duration of the course.
